

JOSHUA LEWIS - MYLAN PHARMACEUTICALS

While a summer intern in 2003, Josh Lewis worked in the lab of Dr. Kathleen Brundage at WVU. His research project involved a study of the toxicity of the herbicide propanil in cell culture. Shortly after graduation from Fairmont State

University in December 2003, Josh began work at Mylan Pharmaceuticals in Morgantown, WV as a chemist in the bioanalytical laboratory. Since then, he has progressed to the position of Senior Scientist in the Complex Product Analytics laboratory. Among a number of responsibilities, he is involved in method development utilizing techniques such as liquid chromatography and mass spectrometry for the characterization of complex pharmaceuticals such as biosimilars.
